

RIVER OAKS DANCE

OUR GUIDE TO HAPPY, HEALTHY DANCING

River Oaks Dance intends to comply with, at a minimum, the guidelines set forth by the Texas Department of Health and Human Services and, to the extent they are more stringent, the guidelines of the locations where we teach class to keep our dancers and staff healthy. We take pride in our program and how it operates. This is where we are right now, but things may change as the situation changes. We will keep you updated on what is happening through email.

Houston Country Club

Upon arrival to the studio

Upon arrival, your dancer will use the restroom, change into ballet shoes and wash their hands for at least 20 second in the women's locker room. The women's locker room is on the way to the dance room. Hand sanitizer will be available in the studio for students and teachers.

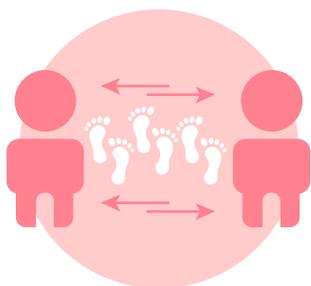

Students are encouraged to wear masks in class.

Although face masks are not mandated for children under 10, at the club at this time, the students are strongly encouraged to wear masks in ballet. With in-person learning starting at schools shortly before or after ballet starts and until the students have a better sense of physical distancing within our dance space, we feel this is the best way to ensure your child's safety. We understand they are young and it may be hard for the little ones to wear a mask, but we will work with them and take "mask breaks" as needed. Teachers and parents are required to wear a face mask at all times.

Stay in your individual dance zone

We will make every effort to keep the children at least six feet from one another and will have a specific physically distanced spot for each child to participate in class. We use lots of props in our younger classes and I will have a personal prop package for each child to take back and forth to dance class. I will have them available the first day of class for \$25.

WHAT PROCEDURES ARE WE TAKING?

Only dancers will be allowed to enter the studio

Parents will wait in the hall, outside or in their car or may workout during ballet. This has always been a practice with our program. If a child is experiencing separation anxiety, they can wait outside the classroom and watch with you through the window until they are ready to come in.

Temperature check

Temperature will be taken of students and teachers before each class and must be below 100.4 to participate in class.

Pick up

Pickup will be toward the back exit of the fitness center closet to the pool.

Sanitizing procedure

Studio surfaces will be sanitized between classes in addition to the daily cleaning of the location

In case of a teacher or student testing positive for COVID

If a teacher or student tests positive for COVID, the class will be notified and the individual may return to class when all four of the following criteria are met: 1. at least 3 days (72 hours) have passed since recovery (resolution of fever without the use of fever-reducing medications); and 2. the individual has improvement in symptoms (e.g., cough, shortness of breath); and 3. at least 10 days have passed since symptoms first appeared; and 4. a negative COVID test result is received.
